

SEARCH REPORT FOR PATNT APPLICATION

ROC (Taiwan) Patent Application No.093120896

(Translation)

1. Filing Date: 13 July 2004											
2. Priority Date: 2004/03/29, 2004/08/08, 2004/08/08, 2004/08/08,											
3. International Patent Classification: B24B7/24 (2006.01), H01L21/304 (2006.01)											
4. Scope of Search on International Patent Classification: B24B7/24 (2006.01), H01L21/304 (2006.01)											
5. Name of Database Under Search (Keyword): TIPO Patent Database (porous pad), EPO (porous pad), USPTO (porous pad), JPO, Patent Information Center of SIPO											
Relevance Code	Cited Prior Art Reference(s) and Relevant Paragraph(s)	Claim(s) of Relevance									
A	1. JP 2001121406 2001/05/08 Abstract, Specification, Claim 1	1-69									
A	2. TW 553797 2003/09/21 Abstract, Specification, Claim 1	1-69									
Explanation of Relevance Codes: <table border="0"> <tr> <td>X: particularly relevant prior art reference(s), if taken alone, that can negate the novelty or inventive step of the claimed invention</td> <td>A: prior art reference(s) related to general state of art</td> <td>O: prior art reference(s) related to publicly using or sale or display at a trade exhibition;</td> </tr> <tr> <td>Y: particularly relevant prior art reference(s), if combined with one or more other documents, that can negate the inventive step of the claimed invention</td> <td>D: prior art reference(s) disclosed in the specification</td> <td>P: prior art reference(s) that has (have) been publicly disclosed during the time period between the priority date and the filing date of the examined patent application</td> </tr> <tr> <td></td> <td>E: prior art reference(s) that is filed earlier but is laid open or published later than the examined patent application</td> <td>L: prior art reference(s) that is (are) cited for other reason(s).</td> </tr> </table>			X: particularly relevant prior art reference(s), if taken alone, that can negate the novelty or inventive step of the claimed invention	A: prior art reference(s) related to general state of art	O: prior art reference(s) related to publicly using or sale or display at a trade exhibition;	Y: particularly relevant prior art reference(s), if combined with one or more other documents, that can negate the inventive step of the claimed invention	D: prior art reference(s) disclosed in the specification	P: prior art reference(s) that has (have) been publicly disclosed during the time period between the priority date and the filing date of the examined patent application		E: prior art reference(s) that is filed earlier but is laid open or published later than the examined patent application	L: prior art reference(s) that is (are) cited for other reason(s).
X: particularly relevant prior art reference(s), if taken alone, that can negate the novelty or inventive step of the claimed invention	A: prior art reference(s) related to general state of art	O: prior art reference(s) related to publicly using or sale or display at a trade exhibition;									
Y: particularly relevant prior art reference(s), if combined with one or more other documents, that can negate the inventive step of the claimed invention	D: prior art reference(s) disclosed in the specification	P: prior art reference(s) that has (have) been publicly disclosed during the time period between the priority date and the filing date of the examined patent application									
	E: prior art reference(s) that is filed earlier but is laid open or published later than the examined patent application	L: prior art reference(s) that is (are) cited for other reason(s).									

Date of Completion: 6 April 2007
